Train-the-trainer Tirana, Albania

Last July, the Digi-Learn partnership brought together adult educators from their countries in Tirana for a three-day workshop organized by Together For Life. The event focused on piloting our Modules and critically examining the main biases that can arise in the delivery of adult learning.

The insights gathered will help refine the Modules, which will soon be freely accessible to everyone through the Digi-Learn website!

What's next

This autumn, Digi-learn partners are planning pilots for trainers and then workshops for adult learners. **Paris, Vigo, Tirana** and **Venice** will become centres of social, inclusive and effective digital courses.

Stay tuned and join our workshops!

Some findings from the Train-the-trainer

- **predominance of women:**
Although the broader ICT sector continues to be dominated by men, basic digital skills training (e.g., email, mobile use) is closely linked with pedagogical and supportive skills - areas socially coded as feminine.
Adult education a clear example of this dynamic.
- **social participation:**
Older adults join courses not only for learning outcomes but also for well-being, social participation, and combating loneliness.
Digital skills courses for seniors needs to be designed with this in mind.
